

ANANYA RAO

Fictional Software Engineer | Bengaluru, India | ananya.rao@example.com | +91 90000 00000 | linkedin.com/in/ananya-rao-sample
| github.com/sample/ananya-rao

PROFESSIONAL SUMMARY

Software engineer with 3+ years of experience building scalable web applications, backend APIs, and cloud-native services. Strong in Java, Spring Boot, React, SQL, and distributed system fundamentals. Known for clean code, ownership, debugging production issues, and collaborating with product teams to deliver reliable user-focused features.

TECHNICAL SKILLS

Languages	Java, JavaScript, TypeScript, Python, SQL
Backend	Spring Boot, REST APIs, Microservices, JWT, Hibernate/JPA, WebFlux basics
Frontend	React, Vite, Tailwind CSS, HTML, CSS, Axios
Data & Cloud	PostgreSQL, MongoDB, Redis, Docker, AWS basics, CI/CD, GitHub Actions
Tools	Git, IntelliJ IDEA, Postman, Maven, Jira, Linux

EXPERIENCE

Software Engineer - NovaCart Technologies

Bengaluru, India | July 2023 - Present

- Built and maintained Spring Boot services for order processing, catalog search, and customer notifications, handling 250K+ monthly API requests.
- Improved API response time by 38% by adding Redis caching, query optimization, and database indexes for frequently used customer flows.
- Implemented JWT-based authentication and role-based access control for admin dashboards and internal tools.
- Created reusable React components and form validation patterns that reduced frontend defects during QA cycles.
- Wrote unit and integration tests with JUnit, Mockito, and Testcontainers, increasing service-level test coverage from 52% to 81%.

Associate Software Developer - CloudBridge Labs

Hyderabad, India | August 2021 - June 2023

- Developed REST APIs for document upload, metadata extraction, and user activity tracking using Java, Spring Boot, and PostgreSQL.
- Designed normalized database tables for users, files, audit logs, and permissions to support multi-tenant workflows.
- Integrated third-party email and payment webhooks with retry handling, idempotency checks, and structured logging.
- Collaborated with a 6-member agile team to release features in two-week sprints using Git, Jira, and code reviews.

PROJECTS

DocuAssist - AI Document Q&A; Platform

- Built a full-stack prototype that lets users upload PDFs, extract text, chunk documents, store embeddings, and ask contextual questions.
- Used Spring Boot, React, PostgreSQL, vector search, and prompt templates to generate answers with source references.

ExpenseFlow - Personal Finance Tracker

- Created dashboards for monthly expenses, category breakdowns, and budget alerts with React, Chart.js, and REST APIs.
- Added CSV import, duplicate transaction detection, and server-side validation for reliable data entry.

EDUCATION

B.Tech in Computer Science and Engineering - Prism Institute of Technology

2021 | CGPA: 8.4/10 | Relevant coursework: Data Structures, DBMS, Operating Systems, Computer Networks, Software Engineering

CERTIFICATIONS & ACHIEVEMENTS

- Oracle Certified Foundations Associate - Java Fundamentals, 2024.
- Completed AWS Cloud Practitioner Essentials and built containerized demo services with Docker.
- Solved 450+ coding problems across arrays, trees, graphs, dynamic programming, and SQL.
