

ROHAN MALHOTRA

Software Engineer | Full-Stack Development | Java, React, Cloud & AI Integrations

Bengaluru, India | +91 90000 00000 | rohan.malhotra@example.com | linkedin.com/in/rohan-malhotra-dev | github.com/rohan-dev-labs

PROFESSIONAL SUMMARY

Full-stack software engineer with 3+ years of experience building scalable web applications, REST APIs, authentication systems, and data-driven dashboards. Strong in Java Spring Boot, React, PostgreSQL, MongoDB, Docker, and cloud deployment. Experienced in integrating AI services, designing clean backend architecture, and improving performance for production-grade applications.

TECHNICAL SKILLS

Languages	Java, JavaScript, TypeScript, Python, SQL, HTML5, CSS3
Backend	Spring Boot, Spring Security, REST APIs, JWT, Hibernate/JPA, Microservices basics
Frontend	React, Vite, Redux Toolkit, Tailwind CSS, Responsive UI, Axios
Databases	PostgreSQL, MongoDB, Redis, Supabase, Pinecone Vector DB
Tools	Git, GitHub Actions, Docker, Postman, IntelliJ IDEA, VS Code, Linux
Cloud & AI	AWS basics, Firebase, Gemini API, OpenAI API, RAG pipelines, embeddings

WORK EXPERIENCE

Software Engineer - NovaTech Solutions

Bengaluru, India | July 2024 - Present

- Built and maintained Spring Boot microservices handling user profiles, document uploads, and analytics workflows for 50K+ monthly active users.
- Improved API response time by 38% by adding Redis caching, optimized JPA queries, and database indexes on high-traffic endpoints.
- Implemented JWT-based authentication, role-based authorization, refresh-token rotation, and secure password hashing using BCrypt.
- Created reusable React components and dashboard screens with Tailwind CSS, reducing duplicate UI code by nearly 30% across modules.

Full-Stack Developer Intern - CloudBridge Labs

Remote | January 2024 - June 2024

- Developed REST APIs for task management, file metadata storage, and team collaboration features using Java, Spring Boot, and PostgreSQL.
- Integrated third-party APIs for notifications and document processing, with retry handling and structured error responses.
- Wrote unit tests for service-layer logic and used Postman collections to validate 25+ backend endpoints before release.

PROJECTS

DocuAssist AI - Document Chat Platform

Java Spring Boot, React, PostgreSQL, Pinecone, Gemini API, Docker

- Built an AI document assistant that extracts PDF text, chunks content, stores embeddings, and answers user questions using a RAG workflow.
- Designed session-based chat history, source citations, and document-level access control for authenticated users.
- Added hybrid retrieval concept combining dense vector search with keyword matching to improve answer relevance.

ShopPulse - E-Commerce Analytics Dashboard

React, Spring Boot, MongoDB, Chart.js, JWT

- Created a dashboard to track orders, revenue, customer retention, and product performance using interactive charts and filters.
- Implemented protected routes, reusable API clients, pagination, server-side filtering, and export-to-CSV functionality.

MovieVault - Movie Search & Wishlist App

React, Java, MongoDB, OMDb API

- Developed a responsive movie app with search, wishlist, movie details, poster cards, and backend persistence for saved titles.
- Used clean component structure and API service abstraction to keep frontend logic maintainable.

EDUCATION

B.Tech in Computer Science and Engineering

Vidut Institute of Technology, Bengaluru | 2020 - 2024 | CGPA: 8.6/10

CERTIFICATIONS & ACHIEVEMENTS

- Oracle Certified Foundations Associate - Java Programming, 2024
- AWS Cloud Practitioner Essentials - Training Completion, 2024
- Solved 450+ DSA problems across arrays, trees, graphs, dynamic programming, and system design basics.
- Recognized as 'Star Intern' at CloudBridge Labs for delivering the document processing module ahead of schedule.
